What if I need to work on or cross the right-of-way?

Before starting any work on or driving over the pipeline, contact your local One-Call Center in advance. Most areas require at least 2 working days notice, but check your local regulations to find out what's required in your area by calling '811' or visiting Call811.com.

The One-Call Center will notify the facility owners in your area, who will send representatives to mark these facilities with flags, paint or other marks, helping you to avoid damaging them. Even if you have a locate, a South Bow representative must be present anytime you are excavating on a South Bow right-of-way (ROW).

What kind of work needs approval?

Before starting any work on a pipeline ROW, you must obtain permission from the pipeline operator. This includes activities like digging on the ROW (even if it's by hand), building a temporary or permanent structure on the ROW or even storing a dirt pile on the ROW.

RIGHT-OF-WAY SIGNS

Pipeline marker signs are placed along the ROW at road crossings, railway crossings and watercourse crossings. They display the name of the operator, product and emergency contact number.

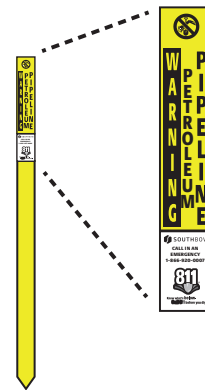

Marker signs

Marker "bullet" post

Marker "slat" post

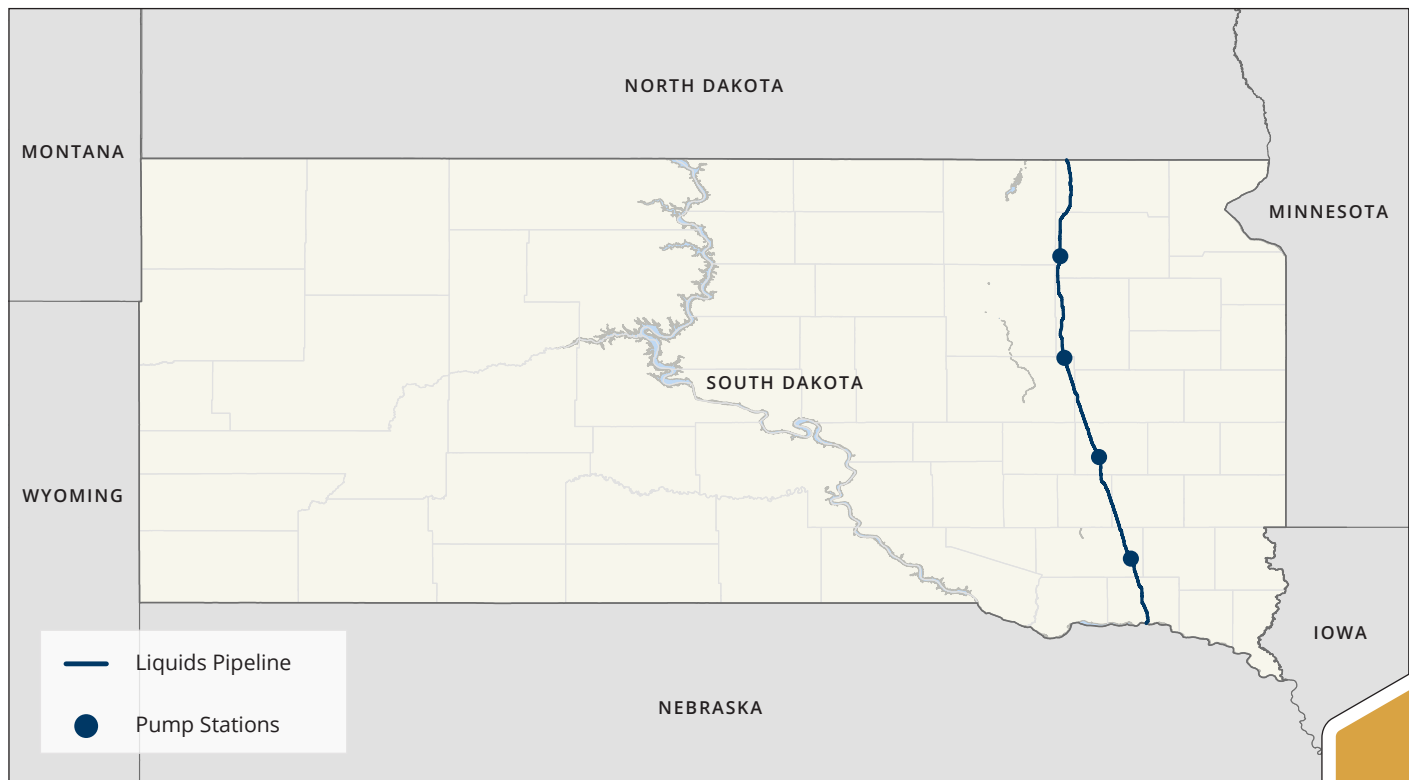

How can I recognize a pipeline right-of-way?

A ROW is usually identifiable as a cleared strip of land without structures or trees, with pipeline markers located at road crossings, waterways and other key locations.

It contains the pipeline and a buffer area that extends on either side of the pipeline. The width of the buffer can vary, but is usually 50 feet. Certain activities are restricted in this area to ensure that the pipeline can operate safely.
